General Use, Upkeep & Chemicals

Never switch the power off. If the power gets accidentally turned off or a power failure occurs please turn it back on in the same way in which you were shown in your demonstration. We will bring you enough chemicals for the duration of your hire, you must use them to keep the spa hygienic.

It's really important that everyone is clean when entering the spa. All traces of dirt, grease, make up, moisturisers & creams must be removed before using the spa. When it's filled with clean water we all want it to stay as clean as humanly possible for both hygiene and unnecessary wear on the pump and spa.

We also sorry to say but if you use a fake tan you cannot use the spa as it will cause lasting discolouration of the spa and result in a damages charge.

If we find the spa unreasonably dirty on collection a fee of £25 will be charged. DO NOT USE bubble bath or soaps, washing up liquid or any other chemicals within the spa. This also means products such as silly string, glitter, body paints etc. These chemicals or foreign objects will ruin the pump. If this occurs it will be classed as gross misuse and we will be looking to reclaim the costs.

If we have to come out to the hot tub whilst on hire to rectify a fault and the fault is found to be down to misuse there will be a £50.00 call out charge.

The hot tub will maintain temperature by itself; although during periods of heavy use or when the cover is removed for an extended period there will be a fall in temperature. Staying out of the hot tub and replacing the cover will allow the water temperature to rise to the desired level.

To change water temperature simply press pad down for cooler and up for hotter.

The hot tub is designed for 6 people. Overloading the hot tub can cause damage for which you will be liable.

When using the hot tub, remove cover and store carefully. Enter water carefully NO JUMPING and make sure it is not too hot (test first).

Over filling the hot tub will cause it to overflow. Each person entering the hot tub will raise the water level by 5-7cm. When the bubbles/jets are activated the water level again rises by a similar amount.

When not using hot tub always replace the cover to retain heat.

Always leave the hot tub plugged in and switched on in order for the filtration/heating systems to work.

It is essential that everyone using the hot tub, showers before use and no foreign bodies e.g. grass, earth, sand, stones or sharp objects are introduced to the water. The hot tub will perform better if kept clean, therefore more enjoyable to use.
